Summary

HealthCostManager (HCM) is an easy-to-use software solution for IRS 1094/1095 reporting which provides a streamlined, cost-effective way to fulfill Affordable Care Act (ACA) reporting requirements.

HCM’s web-based platform is flexible enough to meet the reporting needs of a variety of clients and evolves as health care reporting requirements change over time. HCM is part of a suite of reporting solutions designed by EmployeeTech, a leading benefits technology advisory firm. HCM leverages the knowledge of leading benefit consultants, actuaries and technology professionals with many years of experience in the employee benefits field.

Why Health Cost Manager? Meeting Affordable Care Act (ACA) reporting requirements can be a daunting

challenge. Data resides in multiple locations, and the IRS reports can be complex and difficult to understand. All ALEs (employers with 50 or more full time equivalent employees) are required to file, and many are looking for a practical method for collecting ACA information without consuming substantial internal resources.

While other solutions require complex monthly data collection, HCM is designed for employers with simpler reporting needs; who do not require active management of their hourly

employee population. By focusing just on the data required for ACA reporting, the HCM process and timeline are streamlined, allowing it to be offered at a lower cost.

How it Works

Using HCM File is very straightforward. First we set-up the client account, inputting the required corporate data. This includes contact information and factors driving ACA calculations, such as lowest cost plan details. Next, HCM File requires only a single year-end employee census upload with just the data required for the filing. HCM File’s proprietary algorithm then produces the correct coding for IRS forms 1094-B or C and 1095-B or C. It happens instantaneously, and clients can download and view PDFs of their forms, or an excel summary report, before mailing and efilings their forms

Capabilities

One-Click Access to Reporting

HCM provides expedient creation of 6055 and 6056 reporting with minimal amount of work for the client. Clients are assigned an Account Manager to support them throughout the process: from account set-up through workbook creation, data validation, filing, forms distribution, and post-filing support. Clients can also access Client Advisory expertise as needed.

Once data is uploaded and the HCM algorithm run, employers can generate 6055/56 reports. Individual reprints of the 1095-B or C forms can be downloaded at any time. A Summary Report provides an overview of the company's filing from a corporate perspective and includes all employee data.

HCM - File Features:

Calculation

- Completes Employer form 1094-B or C
- Batch completes Employee form 1095-B or C
- Completes Section III for self-funded plans
- Calculates employee count monthly and # of forms for 1094-B or C
- Generates Summary Report In Excel

Built In Logic and Security

- Determines Correct Indicator Codes
- Streamlines Process
- Reduces Errors
- Assigns Correct Plan Effective Dates
- Interprets Safe Harbor and Transition Relief Designations
- Multi-level security for personal information
- Data at rest at the database level
- Encrypted logins and data management process

1094/1095 Delivery Options

HCM offers a variety of methods for clients to retrieve 1094 and 1095 B or C forms. For clients who have a smaller number of forms, it is easy to download the PDF of each form in real time. Employee forms can be printed on regular copy paper and do not require any special form for printing.

Making changes to employee forms is easy. Simply make the change in the workbook and it will automatically update the form in our system. HCM also offers an Excel report that can be used for mail merge and printing purposes.

Employers may choose our mail/eFile bundle and offload the entire employee form distribution process to us. Employee forms are mailed in a secure, pressure sealed envelope directly to employees' homes.

All filing to the IRS is done electronically, including the initial filing and any post-filing corrections.

Downloadable In PDF

Download 1094 and 1095 B or C forms anytime. Available in batch or by individual employee.

You have access to all of your 1095 form data at any time in a comprehensive MS Excel report.

Mailed to Employee

Upon request HCM File will mail your 1095 forms to employee's homes using pressure sealed envelopes. Advanced sorting and mailing is utilized.

eFile with the IRS

HCM File will electronically file your 94/95 information with the IRS and support an electronic corrections process.

User Experience

HCM File is designed for expedient creation of 6055 and 6056 reporting with minimal amount of work for the client. EmployeeTech will implement the filing using a streamlined process, accounting for key factors in the creation of the tax forms. The information required for the census upload (the second step) is normally produced by payroll or benefits systems reporting. Additional information may be also be added, depending on the specific needs of the employer. All work for the current reporting can be saved and reused in subsequent years, saving time and effort.

HCM File Customer Portal

Each client will have their own customer portal where they can login, review employee forms, run and print reports and generate their eFiling and print/mail distribution, all from the same place. Access to this portal is through a private and secure login process.

HCM File Workbook

HCM File utilizes a simple MS Excel workbook to upload the employee demographic and coverage data. After uploading the workbook, HCM File determines the correct codes for forms 1094-B or C and 1095-B or C. The main requirements for the data are focused on the following key dates:

- Date of Hire
- Effective date of health coverage
- Date of waiver
- Termination or change dates

Employee Demographic Information - Please Complete For any Employee with Active Status during 2016												Initial Health Insurance Co			
First Name	MI	Last Name	Suf.	HCM Employee ID	SSN	Address1	Address2 (optional)	City/town	ST	Zip Code	Zip +4	Class	Date of Hire	Choose only one Coverage Begins	Coverage Waive Dg
John	L	Sample			351-52-9696	12 S. Main Street		Anytown	IL	60001		1	1/1/2013	1/1/2016	

This information can be generated from a payroll, HRIS or health insurance carrier report and combined to populate the workbook. Workbooks are generally uploaded twice during the year; once during the initial test and a second time prior to filing.

HCM File Summary Report

Prior to filing with the IRS, we recommend clients review employee 1095-B or C information for accuracy. Our Summary Report makes it easy by providing a corporate view of all company and employee data in a concise MS Excel format. This report includes all of the data on the 1095-B or C forms including indicator codes and plan cost information on lines 14-16 of the 1095. It is a helpful tool for assessing and validating the company's filing after uploading the data into the system, but prior to filing with the IRS.

HCM File Process and Support

While HCM File only requires a single upload of data to create and reporting at the end of the plan year, there are steps involved in the planning process that will get you ready for the reporting well ahead of the tax reporting requirements.

HCM File Timeline

Clients will be assigned a dedicated Account Manager to support them from the outset, all the way through the implementation process, including data requirements and tax filing guidance. The HCM process works most effectively when the Account Manager, Client, and the Client’s Benefits Advisor work together to complete the Workbook. The steps in this process are detailed below:

Initial Engagement Stage	Client	EmployeeTech
Client Setup	Client works with EmployeeTech dedicated Account Manager in account setup, including client contact information and configuration of health plan details.	EmployeeTech works with the client during the initial data gathering stage, and advises client on selections. Account Manager may drive entire set up process.
Testing Stage		
Data Collection	The client will complete the Census Workbook with employee census including hiring and coverage dates for employees. Dependent census is also completed, if applicable.	EmployeeTech Account Manager will assist the client through the process of completing the census workbook.

Testing Stage (cont'd)	Client	EmployeeTech
Data Validation	The client will either load the census file or send to Account Manager for loading. Data will be validated upon loading.	EmployeeTech will conduct a review call when workbook is complete, provide next steps and timeline, and answer questions on the project. EmployeeTech will review the HCM File summary report with the client to identify any gaps in the data.
Corrections to data	Client will make necessary changes to census and either re-upload into HCM File or send to Account Manager.	EmployeeTech will work with the client to make any relevant changes to the workbook. EmployeeTech can upload new census workbook with changes.
Forms Delivery Stage	Client	EmployeeTech
Distribution of 1095 C forms to employees	Once the reporting is complete the client will log into to system and download forms at no cost, or initiate the mailing of 1095-B or C forms to employee's home.	EmployeeTech will support client technical questions and overall support concerning HCM File.
Reprints and corrections	For reprints, the client will log into HCM File to access reprints and update employee information for revisions to the form.	EmployeeTech will offer support concerning HCM File reprints and corrections.
IRS eFile Stage	Client	EmployeeTech
