

Health security pass

Easy OSHA compliance and inclusivity for all

Key features

Verifiability and inclusivity

Helps avoid labor disputes by offering a choice of clinically equivalent options for vaccinated and unvaccinated participants. Supports evidence uploads by the user:

- Vaccination cards
- Serology (antibody) test
- Monoclonal antibody infusion (mAb)
- PCR/rapid tests
- Exposure risk to COVID-19
- Exemption management

Rapid implementation

Branded or co-branded experience, available for your employees and your customers. Delivered in just a few days.

Accessibility & engagement

No need for user accounts, logins, or passwords. An intuitive chat experience accessible on any device.

No need to download an app. Ability to message your users to share relevant content.

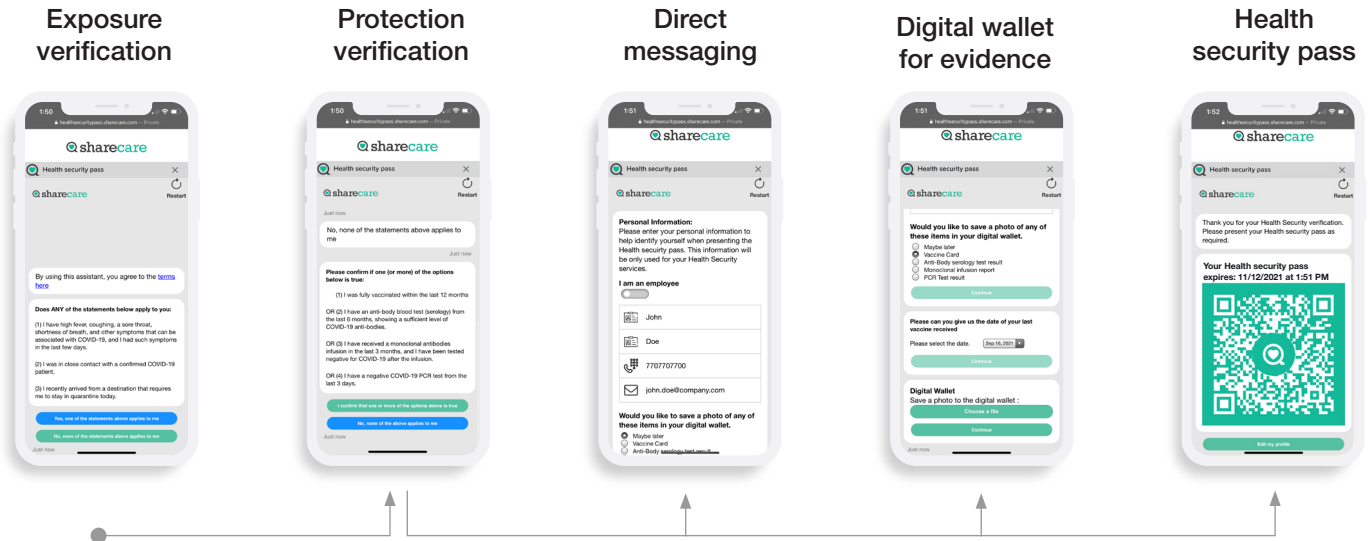

Data efficiency

Get detailed, real-time analytics on the health security of your organization.

Legal and data compliance

Options provided for both vaccinated and unvaccinated users. Safeguard your liability with a reliable audit trail, if needed. Assistance with health data privacy regulatory requirements.

User journey

Scalable health security solution

Support thousands of users and multiple spaces

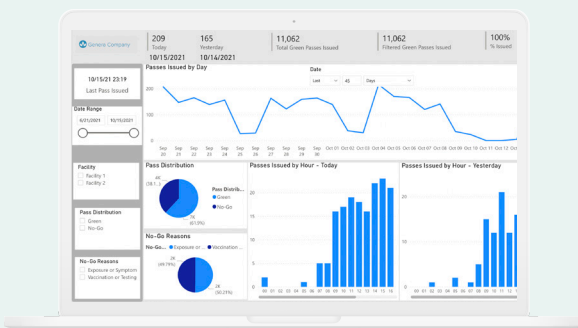

- Works for on-site check-in and remote verification
- Communicate directly with your users via personalized messages and notifications

Easy to implement in just a few days

- Intuitive chat experience
- No app downloads or complex account creation needed
- Self-service portal you can configure to suit your needs
- Also available in Spanish

Part of a trusted health security ecosystem

- Includes a verifiable health security audit trail and evidence for liability protection
- Data managed by certified healthcare technology company
- Easily integrates with our other health security products

Personalized dashboard, metrics, and reporting

Evaluate anonymized screening metrics to assess health trends to avoid threats and comply with state and federal safety guidelines. Visualize information that matters to you. Personalized, detailed, realtime analytics on the health security of your organization.
