

Preparation: Implementation

Before setting off on your mission to revolutionize healthcare, you need a team to get you Mission Ready.

Here are 4 things you can expect from our implementation process.

1

60 Day Guarantee

Some analytics providers can take up to 16 months to collect and transform your data, leaving you and your clients without valuable insights. Then, once the data is ready, it's outdated!

With less than 60-days for implementation, **NavMD** allows you to make a difference in your clients' lives without skipping a beat.

We guarantee you'll spend less time managing data and more time delivering value to your clients.

2

Outsource Management

Our support team will handle outreach to 3rd parties to collect data such as:

- Medical
- Pharmacy
- Biometrics
- Disability
- Dental
- Vision
- Wellness
- Telemedicine
- Onsite clinics

Our end-to-end support will get you back to managing your client's risk rather than serving as their data broker.

3

Compliance Monitoring

One of the biggest challenges today is trusting the accuracy of data. That's why data integrity is key!

We map, enrich, transform, reconcile, test, and validate all of the data and provide you with transparency of its accuracy with an **Integrity Report Card**.

This allows you to provide recommendations to your clients without second-guessing.

4

Support & Training

From start to finish, you'll have access to a designated support specialist that will be your main point of contact for any questions.

Once the data is loaded into **AVISO**, our support team will load users and begin training. But it doesn't stop there!

Post Go-Live, you'll have access to our **AVISO** training library and ongoing support from our sales and support team.

Are you Mission Ready?

NavMD is the analytics provider that can help you take control of your data, get insights fast, and get ahead of the curve.
