

**LABCORP EMPLOYER SERVICES**

Providing flexible, end-to-end solutions  
for healthy, hybrid workforces

The global pandemic created profound changes to the way we interact and work. And hybrid has become the future of work.

Our comprehensive services help you manage the health of your hybrid workforce at the pace of change—keeping you responsive, resilient and ready for the demands of today and tomorrow.

# Answers for a healthier workforce

## COVID-19 Testing and Screenings

In response to the COVID-19 pandemic, Labcorp is helping American businesses return to work safely and confidently by offering various screening and testing options available both on-site and off-site.

**COVID-19 PCR testing** uses a self-collection nasal swab performed in the presence of a healthcare worker to detect the existence of the underlying virus, SARS-CoV-2. Pixel by Labcorp® At-Home COVID-19 test collect kit is a PCR test which detects the presence of the SARS-CoV-2 virus via a self-collected nasal swab. Pixel by Labcorp was the first COVID-19 test home collection kit granted Emergency Use Authorization by the FDA.

**The antigen point-of-care test** uses a self-collection nasal swab, providing results within 20 minutes.

**COVID-19 Serology testing** determines the presence of antibodies to SARS-CoV-2, the virus that causes COVID-19, and helps identify individuals who have been exposed to the virus. The serology testing is available as a standard blood draw or a fingerstick blood test.

**Temperature check and symptom questionnaire screening** helps essential businesses identify employees with an elevated temperature and other possible COVID-19 symptoms who are reporting to work during the COVID-19 outbreak, or who are requesting to return to work.

## Flu Vaccinations

Offering flu vaccinations is one of the best ways to keep your employees healthy and productive during flu season. We offer both on-site clinics and an off-site voucher option.

## Drug-Free Workplace Testing

Labcorp understands that a healthy, productive workforce begins with a drug-free workplace. Our comprehensive menu of regulated and non-regulated laboratory-based tests, as well as rapid test options, are designed to meet the needs of most workplace testing programs. Drug testing options include urine, oral fluid, hair, and blood.

## Diagnostic and Preventive Tests

Labcorp has the ability to customize employee assessments to meet the needs of your organization's employee population. Our comprehensive menu of diagnostic and preventive tests can be combined to achieve employee wellness objectives.

## National Specimen Collection Network

Labcorp offers drug screen collections at nearly 2,000 patient service centers (PSCs) across the U.S. For customer convenience, select PSCs offer specimen collection and biometric screening. Our national specimen collection network provides additional coverage through third-party facilities, assuring that your employees are never far from a network facility.

### Commonly Ordered Wellness Tests

Labcorp offers blood tests that assist in the detection of cardiovascular disease risks and diabetes. The vital data provided by these tests can help save employees' lives and reduce long-term health care costs. Commonly ordered employee wellness tests include the following:

- Lipid Panel\*
- Hemoglobin A1C\*
- Comprehensive Metabolic Panel (14)
- CBC with Diff/Platelets
- Prostate-Specific Antigen (PSA)\*
- Thyroid-Stimulating Hormone (TSH)\*
- C-Reactive Protein (CRP)\*
- Cotinine (Nicotine)\*

\*Available through the Lab-in-an-Envelope program

### Biometric Screenings

- On-site: Labcorp offers comprehensive on-site biometric screenings that include measures of height, weight, blood pressure, waist circumference, body mass index (BMI), and involves a blood draw (either standard blood draw or fingerstick) to check cholesterol (HDL, LDL and total), glucose and triglyceride levels. Our fingerstick test provides results within minutes, allowing the option for employees to then discuss their results with a registered dietitian.
- Off-site (Labcorp and PCP vouchers, Lab-in-an-Envelope, Labcorp OnDemand): To accommodate remote employees or those who cannot attend the designated on-site event, we offer various off-site options, including Labcorp and primary care physician vouchers and at-home testing via our Lab-in-an-Envelope and Labcorp OnDemand services.

Testing Options	On-Site	Off-Site	At-Home
<b>COVID-19 PCR Testing</b>	Yes	At Labcorp patient service centers for asymptomatic individuals	Yes
<b>COVID-19 Serology Testing</b>	Yes (IgG and IgM antibodies)	Yes (IgG antibody) at Labcorp patient service centers including Labcorp at Walgreens	No

<b>Flu Vaccinations</b>	Yes	Yes	No
<b>Biometric Screenings</b>	Yes	Yes	Yes

# Additional corporate well-being offerings

## Population Health Programs

Our population health programs support employees on a transformative journey towards greater well-being. Labcorp's team of registered dietitians helps participants make positive, sustainable behavior changes so they can lead their best lives inside and outside the office. The program is designed to fit seamlessly into an employee's routine. There are three key ways to participate: one-on-one telephonic coaching, 24/7 access to secure messaging, and on-site, one-on-one sessions.

## Comprehensive Wellness Programming

Wellness programs offer employees opportunities to learn about and improve every aspect of their health. Labcorp looks at the full picture of workplace well-being, including custom initiatives that make a lasting impact on your company culture and bottom line. We provide employers with actionable insights to achieve population health goals and meaningful outcomes.

## Assuring a Safe Work Environment

### Biological Monitoring and Exposure Testing

Labcorp offers a comprehensive menu of biological monitoring and exposure testing conducted in Labcorp OSHA-certified laboratories. These tests are designed for monitoring workplace exposures to toxic metals and chemicals, including lead, mercury, arsenic and cadmium, as well as, benzene, toluene, PCBs, halogenated hydrocarbons and chlorinated pesticides.

### Industrial Allergy Testing

Reactions to latex, adhesives or chemicals can result in employees who cannot work at full potential, increased absenteeism and additional health care expenses. Our industrial allergen testing can assist in identifying allergies to prevent lost productivity and allergy-related healthcare costs.

## Member Portal

Labcorp's member portal serves as a dynamic hub that gives employees access to the full range of their wellness program. With a mobile first approach, employees can access key resources anytime, including real-time tracking information, easy appointment scheduling, communicating with our team and more.

## A La Carte On-Site Offerings

Our diverse on-site options can complement any wellness program. Labcorp brings highly trained experts to the workplace to promote the full breadth of the wellness program.

On-site offerings include:

- Wellness Coordinators
- Population Health Programs
- Live Demos
- Seminars
