

Tools to Succeed

For the Successful Benefits Advisor

At times, it may seem like healthcare is broken, and nothing can be done to fix it. However, with the right tools, right solutions, and right team by your side, **this mission is possible!**

AVISO is the tool brokers need to dig deeper into the member detail in order to provide better health, better value, and better care.

Emerging Risk

Identify where your population's predicted emerging risk is headed to mitigate high-risk claims before they happen.

Plan Cost vs Budget

Understand plan cost to budget and easily identify where overages occur.

Health Segmentation

Understand the Chronic Disease Burden of your health plan to focus in on what is driving cost.

Pharmacy

Isolate specialty medications for carve-out or injectable drugs going through the medical plan for intervention.

Plan Modeling

See financial savings/costs from a plans perspective down to members impacted positively or negatively by a change.

AVISO

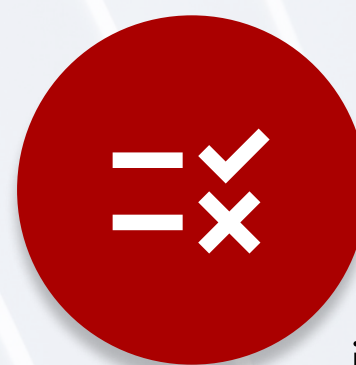

High-Cost Claimants

Predict cost and risk for every member for stop-loss premium reductions and population health management solutions.

Compliance Monitoring

Measure compliance to evidence-based medicine protocols for proactive engagement, increasing compliance to mitigate cost and risk.

Wellness Investment

Based on your actual populations, understand the value of reducing risk through increasing compliance: potential cost and ROI to the plan through value-based insurance modeling.
