

Health and Care the way it should be

Transparent is your Members' single point of access for all their health and care benefits.

Every day, any time of day, your Members have information, support, and high-quality care at their fingertips—all at no cost to them.*

**If your Members are enrolled in a high deductible plan, there's no cost to them after their deductible has been met.*

Transparent is available to your Members and their covered family members enrolled in a company health plan.

Your Members' Health— Their Care at their fingertips

Now, your Members can forget about opening multiple tabs, rifling through their filing cabinets, and trying to track down information—**Transparent is their single point of access when it comes to health care.**

24/7 Virtual Care

We make connecting with a doctor as easy as texting a friend. Your Members can skip the wait and talk to a doctor when it works for them—in under 60 seconds. No pre-registration or appointment needed.

Care at Home

Say goodbye to uncomfortable waiting rooms and experience the convenience of care at home. For urgent health needs we bring care to your Members' homes. They can ask their Health Guide if Care at Home is available in their area.

Health Guides

When it comes to your Members' health, sometimes they just want to talk to a person—the same person so they don't have to tell their story multiple times. Our Health Guides are here to help them by phone or chat.

High-Quality Provider Finder

Your Members can find high-quality, in-network providers to receive care specific to their own needs. They can access accurate and up-to-date contact and coverage information for nearby providers—with full transparency and granular detail on performance scores. Our Health Guides can even help schedule an appointment.

Expert Second Opinion

Your Members can make medical decisions with confidence and ensure they receive high-quality care. We can connect them with a team of expert doctors and nurses to help them understand medical conditions, learn about available treatment options, and get a virtual second opinion.

Musculoskeletal Care

If your Members are suffering from back, joint, or muscle pain, or need pre- and post-surgical support, our virtual physical care program provides comprehensive musculoskeletal care that they can use from the comfort of home. A physical therapist designs a program just for them and is there to chat any time.

Surgery Care

When your Members need surgery, we help them get the best care for their procedure—best of all, Transcarent makes sure they pay little to nothing. Our Care Coordinators guide them through the surgery process so they can focus on their health and recovery.

My Benefits *via the Transcarent App*

Your Members can access all of their health and care benefits offered by Transcarent in one convenient place through the Transcarent app.
