

DISCOVER

THE MARKET'S LEADING BENEFITS AND TOTAL REWARDS PLATFORM

Engage your employees **anytime, anywhere.**

Our platform helps employers create an exceptional benefits and rewards experience while reducing benefits administration, automating processes, radically improving the communication of their employee value proposition and ensuring better data governance and management of benefit and reward costs.

OUR PLATFORM WILL HELP YOU:

SHOW YOUR INVESTMENT

8 out of 10 employees underestimate their total compensation. Our platform presents employees a clear, visual representation of their total reward beyond just their salary.

OPTIMIZE YOUR COMMUNICATION

Effective communication is vital to every company. Our cloud platform makes it possible to not only tailor messages, but also use relevant and specific channels for each employee.

REDUCE YOUR ADMINISTRATION

With automated processes for each step of the employee lifecycle, employees have more time to focus on other parts of their work such as strategy and creativity.

WHY DOES YOUR COMPANY NEED BENIFY?

GLOBAL DASHBOARD

Through an immersive global experience, HR professionals can manage their entire global workforce from a single source. With a global-but-local approach, administrators can gain insights from benefits and compensation data to assist with strategic decision making.

TOTAL REWARD

Make employees aware of your full investment. A Total Reward Statement reflects an employee's total reward and compensation package, including benefits and other add-ons to create awareness and understanding of his or her true value.

DIGITAL PREBOARDING, ONBOARDING AND OFFBOARDING

Before starting their first day, right through to their final day, digitalize the employee lifecycle with the platform's preboarding, onboarding and offboarding tools.

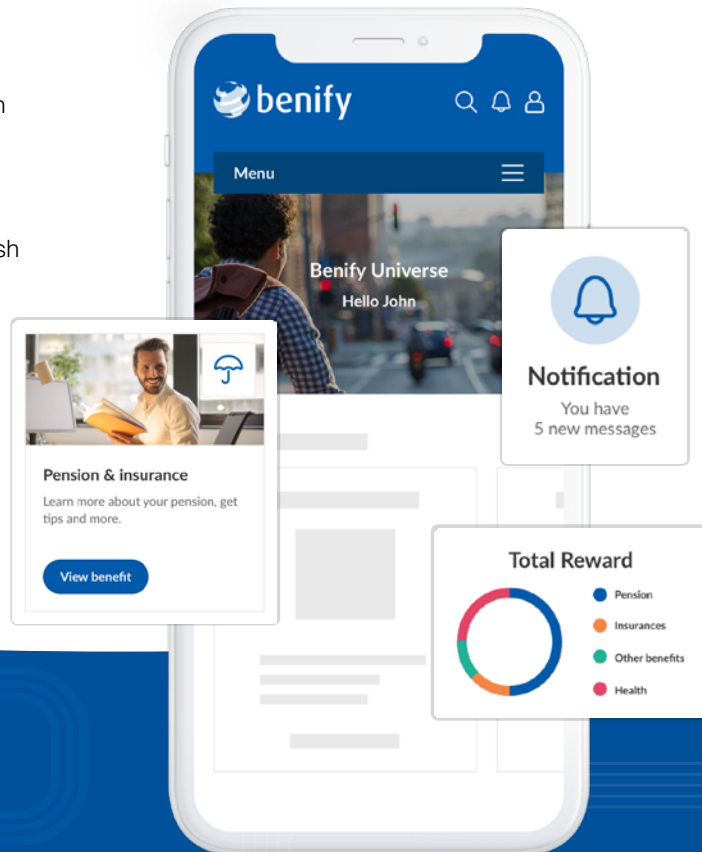

DIGITAL BENEFITS ENROLLMENT

By enabling employees to enroll in benefits digitally, companies not only create greater employee self-service but also reduce administration, human error, and cumbersome processes, resulting in significant cost savings.

COMMUNICATION ENGINE & APP

Use the platform's integrated communication engine to send personalized, targeted messages. Send the right message to the right group using the right channel. Best yet, you can engage your workforce wherever they are through the Benify app by using push notifications.
