

# A Virtual Clinic for GI Conditions

Integrated, whole-person care for gastrointestinal conditions that achieves improved satisfaction, quality of life & work productivity at lower overall cost.

OSHI HEALTH®

## THE SIZEABLE, BUT SILENT, IMPACT OF GI CONDITIONS

70mm+ Americans are diagnosed with a digestive health condition

Traditional gastrointestinal (GI) care is fragmented, hard to access, expensive and not meeting patient needs. The reactive approach and focus on procedures & medications instead of integrated, whole-person care leave patients struggling until things escalate. Stigma means patients often suffer alone in silence.

**100MM** Americans suffer from chronic GI symptoms

**8 Days** per month productivity is negatively impacted by IBS, plus 2 missed days per month

**\$136B** cost of digestive health conditions, 2nd only to cancer in aggregate cost

**71%** of IBS patients are not satisfied with their care

## REDESIGNED GASTROINTESTINAL CARE

### Patient-Centered

Our integrated clinical team takes time to identify the root cause of symptoms and support patients with a whole-person treatment plan built around their life & preferences.

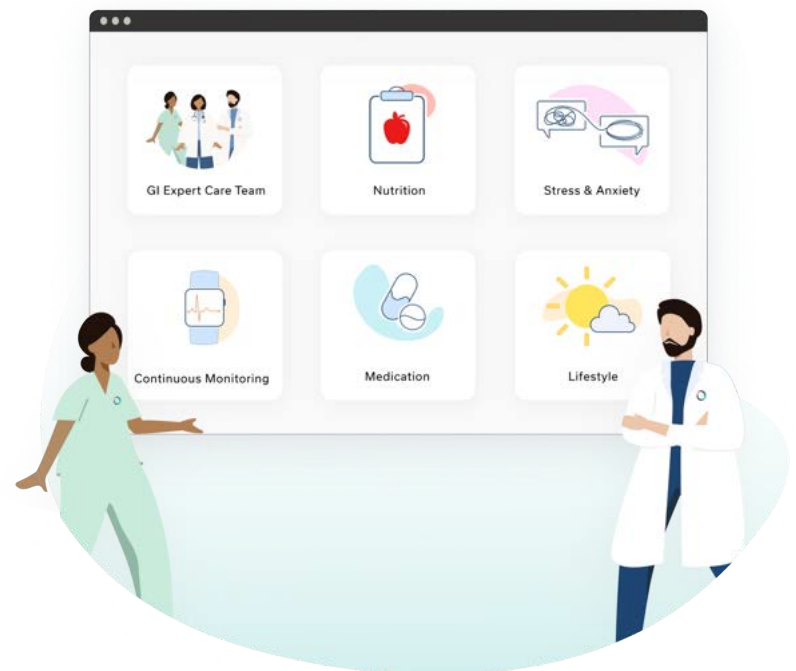

### Virtual First

Our telehealth-first model allows more frequent touch points between patients and our GI-specialized care team when they need support most from work, home or any convenient location.

### Value Based Approach

We are not driven by fee-for-service, volume-based incentives. Our relationship-based, ongoing care focuses on improving patient lives at fixed cost.

# Improved Outcomes and Experiences

## EARLY EVIDENCE OF PATIENT SATISFACTION & OUTCOMES

In a 10 week study, Oshi Health's registered dietitians and GI health coaches helped patients with IBD, IBS & GERD implement diet, lifestyle and stress management interventions to improve outcomes.

**91%** patients gained symptom control

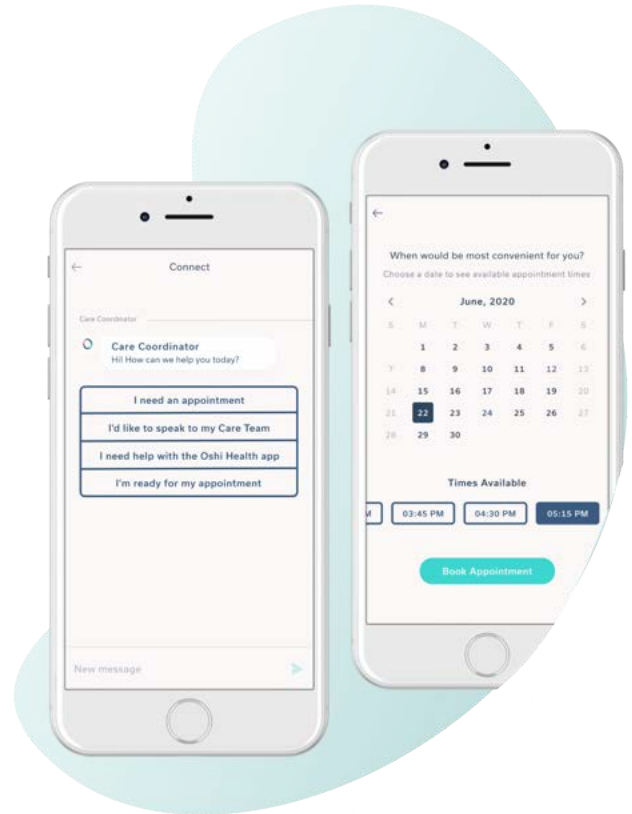

**+67** Net Promoter Score (NPS)

**4.95** Customer Satisfaction Score (CSAT)

## OSHI HEALTH IMPROVES CARE FOR YOUR GI POPULATION

Oshi Health identifies and addresses the root cause of GI symptoms with a relationship-based, whole person care model that supports patients from diagnosis through ongoing care and maintenance. Targeted program outcomes include:

- ✓ Increased symptom control & quality of life
- ✓ Avoid costly ER visits and medication escalation
- ✓ Reduce unnecessary colonoscopy & endoscopy
- ✓ Boost overall patient productivity & satisfaction

## LET'S GET STARTED

Oshi Health works with plan sponsors to offer our services as a covered benefit to their employees or members. We provide diagnosis and ongoing care whenever and wherever members need help. We offer bundled monthly pricing to ensure costs are clear and predictable for our customers.

- ✓ Self insured employers
- ✓ Commercial payers
- ✓ Bundled pricing
