

6 KEYS TO

UNLOCK BIG SAVINGS WITH A CONDITION MANAGEMENT PROGRAM

HealthCheck360 ensure employees with chronic health conditions get the personalized care and support they need to improve their well-being and to lower medical plan costs. We've been doing this for a long time. Our 20 years of experience proves that we have the keys to unlock better results.

01

Have a Condition Management Program

Having a condition management program available to your employees and plan members can reduce costs by **7.3%**, or **\$936** per compliant member per year.

02

Use a Program that Auto-enrolls

Most programs ask employees to voluntarily sign up, leading to low enrollment rates of **20 - 40%** at best. HealthCheck360's auto-enroll program means **100%** of eligible employees being enrolled.

03

Incentivize with Meaningful Rewards

Rewards like premium discounts, covering the cost of medical supplies, and gift cards takes your program to the next level. Our research shows that companies who use rewards and incentives see 29% higher engagement than non-incentivized programs.

04

Include Easy-to-use Technology

As the Pathwise Financial Wellness advisors identify gaps employees have in their finances and coverages like life insurance and disability, they refer employees back to your existing benefits plan.

A MOBILE APP

Members can see their program on-the-go and share details with their doctor.

TO-DO LISTS

Keep members aware of what they need to complete and when.

SMART REMINDERS

Let users know when a due date is approaching or a deadline has been missed.

DEVICE AGNOSTIC

Members can use whatever tracking device they already own.

ACCESS TO COACHES & NURSES

Support members when they have questions or readings that are out-of-range.

05

Support Multiple Conditions

If someone has one condition like type 2 diabetes, they likely have hypertension or high cholesterol. Working with a vendor that supports multiple conditions means your members get support, one point of contact, and better outcomes.

06

Objectively Measure Compliance

If you're not getting people to see their doctor, take their meds, and make lifestyle changes, you won't see the results you're looking for. Gather baseline data and then measure your members' compliance rates each year the program is in place.

Compliance at a Glance

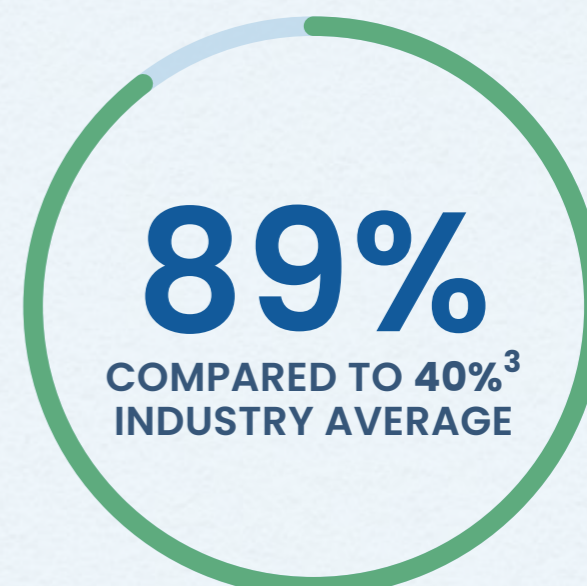

HealthCheck360 members regularly experience compliance rates nearly double national averages.

Diabetes

Hypertension

Asthma
