

Robal Tech, LLC : Press Release

Version: Alpha v3.2.1 - 6/27/2023

Today Robal is thrilled to unveil updates to its groundbreaking product, **Remote I-9**. Designed to help facilitate the physical inspection of your Form I-9 documents. To make this process easier Robal gives you the ability to select an authorized representative to physically inspect your Form I-9 Documents combining cutting-edge features with unparalleled functionality.

At Robal we understand the need to listen and stay ahead of the ever-changing world of technology and HR. Our customer success team communicates the needs, wants, and wishes of our customers to our product development team. With that key cross-functional communication we can consistently enhance our current features and build new products in a timely manner to make sure our customers never have to worry.

New Features

- Electronic Audit Trail - Companies can be more assured that the I-9 is done correctly. Robal has added IP addresses and Geo Location information for both the employee and the authorized representative into the electronic Audit Trail.
- The ability for the employee to revoke access at any time just in case wrong information was entered when adding in an Authorized Representative.

Coming soon

- Talent and workforce management system.
- Self-service bulk upload of users.
- A free trial version of the I-9 solution.
- Partnership with Jobadder.
- State tax enhancements
