

Digital-first precision advocacy **PLUS** well-being & benefits navigation platform, all delivered at scale

At Sharecare, our mission is to empower the health and well-being of every person by focusing on simplifying every part of their healthcare experience. Sharecare+ provides a comprehensive whole health advocacy solution that is purpose-built to deliver efficiency, productivity, quality, and reduced cost of care – all while making your employees and members happier, healthier, more satisfied, and more productive.

PLUS, you get all our interoperable well-being and benefits navigation features with a wealth of resources for advocates to personalize the health experience for your population with to unify all the elements of each individual's health and their data so they can live better, longer across the continuum of their healthcare journey – as an employee, health plan member, patient, or community member.

It's precision advocacy, tailored for your employees and their families.

Sharecare+ is the only advocacy solution in the industry that engages individuals and families in their holistic well-being journey by providing direct, simplified access to all their benefits and seamless high-touch support from professional advocates to easily navigate the full scope of their healthcare needs on their terms – whether that is managing a chronic condition, helping address mental health challenges, navigating complex benefits, finding the right doctor, understanding a claim, navigating to the right care, managing overall lifestyle risk, or just learning healthier habits. Sharecare does it all – and our advocates will help your members find exactly what they need, when they need it.
