“We can look at different parameters in Sparta and see the profiles that place a person at risk. We have the ability then to put in place a program to minimize that risk”

**Dr. Brian Sennett, MD, Chief of Sports Medicine & Orthopedic Surgeon,
University of Pennsylvania Medicine**

“We finally have a way to functionally validate our rehab throughout our patient populations with objective measures for the workforce that we treat. This information is priceless when determining if they’re ready to return to work!”

Chad Arceneaux, Owner & ATC, UnLock Training (training 10,000+)
