The world's largest & richest microbiome dataset powers our blood sugar prediction engine

- Predict glucose response before eating
- Score one million food items /meals
- Eat what you love with small modifications

Why it works: People respond differently to the same foods

Because one-size-fits-all solutions don't work, **DayTwo offers precision nutrition.** Individualized food glucose response predictions paired with 1:1 dietitian support for sustainable success.

— With DayTwo

How it works

Microbiome Analysis

Unprecedented insights into each person's unique gut microbiome makeup

Glycemic Response Predictor and App

Predict individual blood sugar response to any food with an easy to use app and high engagement

Clinical Team

1:1 video and text support with Registered Dietitians and health guides

Soc 2 Type II Certified | A high designation for ongoing security compliance

"Losing weight, lowering my A1C, and getting my blood sugar under control meant **I was disqualified from an invasive gastric surgery.** I'm so grateful for DayTwo!"

Weight loss **-30 lbs.** Reduced A1C from **7.1 to 5.8**
Saved employer \$23K from surgery costs
