

# 10-Minute Skin Cancer Screenings That Come to You

Skin cancer will impact 1 in 5 of us.  
Now you can bring early detection and  
prevention to your employees with SkinIO.

## **A lifesaving, formerly inaccessible offering for your employees**

- With just 1 dermatologist for every 33,000 Americans, early skin cancer detection hasn't been an option for most
- SkinIO offers 10-minute medical-grade skin screenings, remote dermatologist review, and connection to in-person care when necessary

## **A premium quality experience for your people**

- Our trained staff spend 10 minutes taking regional and close-up photos of participants' skin in one of our custom private screening tents
- Each participant receives their results by email in 2-3 business days
- Anyone flagged for in-person follow-up can be connected to an in-network dermatologist in their area who'll see them in weeks, not months

## **A turnkey solution for you**

- SkinIO provides everything you need to host your onsite skin screening event
- 8'x8' privacy tents, trained staff, SkinIO iPad-based technology, customized marketing materials
- Whether it's a high school gym, conference room, or airplane hangar, SkinIO can transform any space into a private screening area

**Ready to bring lifesaving early detection to your employees?**

**Talk to us.**
