

Employee Engagement in the Digital World

Attract and retain talent promoting a company culture of health and wellbeing with SmartFHR™ powered by Green Circle Life. This innovative, all-in-one communication and employee engagement platform aggregates employee-facing HR, wellness, communication, and healthcare services into a single app accessible from any device.

SmartFHR™ enables your own Digital HR Ecosystem by seamlessly integrating internal and external systems using single-sign-on and data integration. This generates greater return on benefits investments by enabling users to do everything from one app like benefits enrollment, payroll, time and attendance tracking, health and wellness programs, and receiving important company communications.

Switch from traditional company HR management tools to the SmartFHR™ platform. This interactive tool for productivity and behavioral change is

designed to stimulate and reinforce healthy lifestyle changes and improve overall wellbeing. Since most decisions in areas like benefits selection, wellness, and chronic condition management are fundamentally family-driven, SmartFHR™ enables family member participation.

SmartFHR™ will improve productivity and outcomes using multi-channels of communication and powerful analytics and reporting. Based on individual employees, targeted employee groups, or the entire population.

Green Circle Life stands out in our commitment to personalization and service – we are a one-stop-shop not a one size fits all. The SmartFHR™ App can be custom branded, configured and customized to meet your needs.

The SmartFHR™ is EEOC and HIPAA compliant, and is available on iOS, Android, and Web.
