

Wellvibe is an online health management and engagement solution that identifies and mitigates risk within your population. The Wellvibe engagement engine continually evaluates a population, and based on the proprietary Allostatis profiling, predicts future health by measuring how poor lifestyles habits and stressors affect lives. This unique risk prediction tool proactively identifies individuals before symptoms or disease occur.

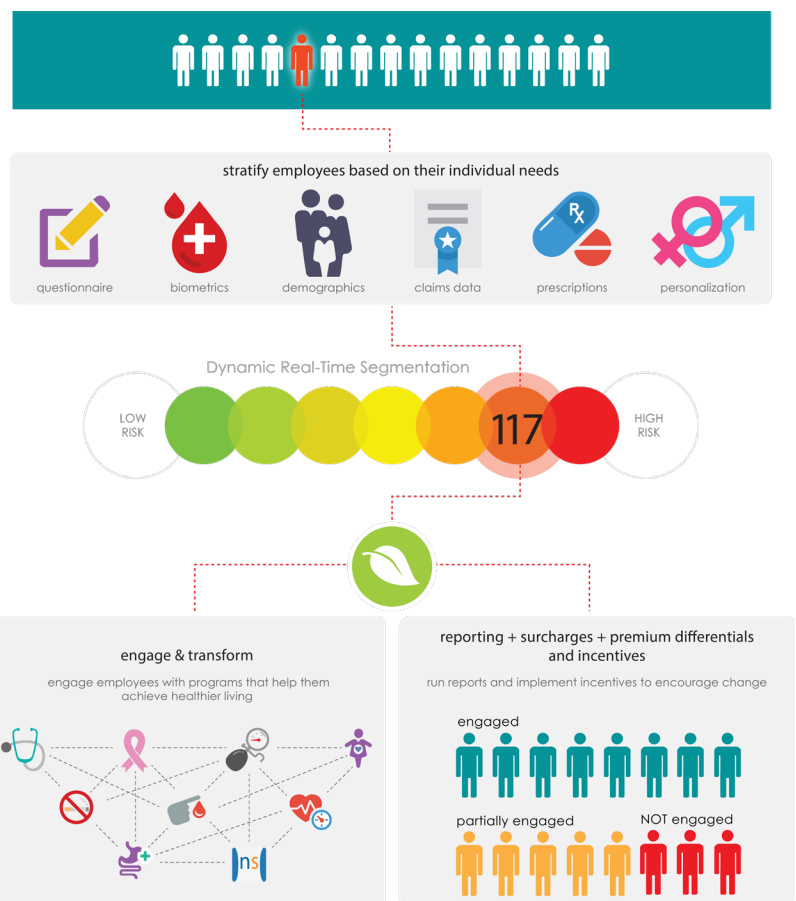

## Platform Benefits

**Personalization** - Age/Gender, HRA responses, and Biometric results are all used to personalize the **individual's** program through use of our clinical logic.

**Communication** - Our automated communication solution keeps members and program admins informed in **real-time**, without burdening HR.

**Integration** -We seamlessly cut through the complexity of vendor integrations. To date working with **Naturally Slim, Compass, Kannact, and E-Health** to name a few.

**Reporting** - Features real-time, **robust** reporting capability to **easily track** participation and outcomes to administer incentives.
