

# Nationwide Biometric Screening Services

## The LES Difference

### Superior Participant Experience

#### High Quality Staff

LabCorp Employer Services (LES) screening staff are W-2 employees, not contractors. They are carefully vetted by our Talent Acquisition team and receive extensive training. On-site supervisors monitor every screening to ensure accuracy and efficiency. LES standards are rigorous and maintained through company and industry quality control measures.

#### Simple Appointment Scheduling

Every client receives a branded, customizable online appointment scheduler. Calendar syncing and text message reminders are standard, and a single sign-on option makes the participant experience seamless. Telephonic scheduling is also available through the LES in-house Customer Care team at no additional cost.

#### Expert Health Education

Each LES screening includes a brief results review with in-depth health education as an optional service. LES health educators are registered dietitians who provide expert clinical knowledge and extensive personal coaching experience.

#### Extensive and Convenient Off-Site Options

LES partnerships with multiple labs nationwide equate to 5,000 off-site collection sites for spouses, remote employees, and employees unable to attend on-site screenings.

Every online physician form and voucher can be easily downloaded. These items are pre-populated with the participant's information for optimal convenience.

### Stress-Free Implementation

#### Dedicated Client Success Team

Our dedicated client success managers attend to every detail of managing the implementation process from start to finish. We tailor each event to meet the needs of your population. If assistance is needed, your client success manager is your single point of contact—always accessible and ready to help.

### Advanced Data and Reporting

#### WellConnect Plus: Seamless Portal Experience

WellConnect Plus makes it easy for participants to schedule appointments and review their recent and historic results. With advanced administrative settings, it's easy for clients and participants to take full advantage of their health and wellness programs.

#### ScreenSMART: High Tech Data Collection and Powerful Event Management

Our popular tablet data collection application is more powerful than ever. Real-time data transmission, always encrypted and secure. A health educator module with current and historical data. On-site satisfaction surveys with instant results. ScreenSMART also features a powerful peer-to-peer staff rating system that supports the highest-quality screening staff in the country.

#### LES Analytics: Dynamic Client Dashboard

Up-to-the-minute statistics on participation, engagement, and population risk— at your fingertips, whenever you need them. Explore year-over-year metrics.

Drill down results by population segment or worksite location. Benchmark your company's data against other organizations similar in size and industry type.

Work enabled. People empowered.
