THE PROBLEM

ERP and P2P systems are complicated to navigate.

Users often feel overwhelmed and confused, even after intensive training sessions. This leads to unnecessary mistakes and tasks taking longer than they should.

THE SOLUTION → PROJECTOR

With Projector®, Users can gain system confidence and independence.

Create custom and easy-to-follow step-by-step guides for each of your procedures. The directions are directly projected onto the User's screen, allowing them to fulfill their task without having to reference another source.
