

# Ready? Ready.

Through every step of the pandemic, keep your workplace safe with Buoy

Back With Care™ is a digital solution that can seamlessly integrate with your organization's COVID-19 plan.

The platform takes a clinical approach to maintaining safety, with Buoy's in-house medical and engineering teams updating the experience for the utmost accuracy through the ever-changing pandemic. As the COVID-19 vaccine rolls out, Back With Care will evolve to provide the support and resources for making the right decisions for your organization.

## The Back With Care™ platform includes:

### Daily COVID-19 risk screening

Maintain worksite safety through a clinically-informed assessment

### **NEW!** Vaccine rollout planning

Understand employee sentiment and inform capacity planning

Stay tuned...Back With Care™ is not a one-and-done product. As needs around the pandemic evolve, expect capabilities to follow suit.

## Keep your workplace safe

Our daily screener uses the latest guidance from authorities like the CDC and WHO and Buoy's in house clinicians to assess eligibility for in-person work on any given day.

- Use our screening tool to provide a standardized process for evaluating safety within three hours before entering the workplace
- Employees assessed as low-risk of having COVID-19, receive a date- and time-stamped pass to grant entry to the physical workplace.
- Buoy's medical team performs constant vigilance on emerging guidelines and consults with an external advisory panel to keep screening protocols up-to-date.

## Navigate employees to the right care resources

Buoy recommends tailored next steps based on the employee's responses and your configurations.

- After considering severity of symptoms and related factors, Buoy directs employees to the benefits you've curated for them (e.g. telemedicine or EAP)
- Direct employees who indicate their interest in receiving a COVID-19 vaccine to local, and preferred vaccination sites
- Drive use of the right existing resources for fewer unnecessary claims and a greater reduction in costs

## Manage the vaccine rollout

NEW!

As employees look to you for information about the COVID-19 vaccine rollout – look to Back With Care™.

- Get insight into your employee population's desire to get vaccinated
- Leverage those insights to develop a proactive and targeted communication strategy
- Combat hesitancy by communicating important vaccine information clearly
- Capture employee's vaccination status & provide second-dose reminders
- Inform capacity planning by capturing vaccination status

## Get real insights in real time

Think: Smart data without the complexity. Thanks to clear information for the worksite level and beyond, you're equipped to make the safest decisions for your business.

- Use Back With Care™ screening results and vaccine status to support capacity planning and contact tracing
- Monitor COVID-19 trends through across worksite locations
- Leverage the real-time dashboard and automated trend reporting to inform internal plan and pivot if necessary
- Designed to protect employee privacy and limit PII/ PHI exposure

## Consider yourself supported

**Buoy's with you every step of the way. This includes:**

- A two-week turnkey implementation process
- An employer playbook outlining the Back With Care™ roll-out process and best practices
- Templated employee communications like emails, FAQs, and worksite signage
