*APS guarantees tax payments and filings to be accurate and timely, as long as the data provided to APS is accurate and timely and the customer's account is sufficiently funded to cover all payroll tax liabilities. If a tax penalty is the result of our error, we'll maintain the abatement process and absorb any fines or interest due.

About APS

APS has a mission: to make payroll and HR easier. We design our unified solution to simplify workforce management tasks for mid-market organizations. We provide our clients and partners with personalized service and support to accomplish their goals. Streamline payroll processing, automate HR workflows, and elevate the employee lifecycle with a single-system platform. We are APS, your workforce partner.

Mid-sized businesses choose APS as their workforce partner because of our focus on the customer experience. As a result, we continually maintain 98% customer retention and satisfaction rates. For more information on APS and how we can help make payroll and HR easier for your mid-market business, visit <https://www.apspayroll.com>.

Security

WE COMPLY WITH INDUSTRY-STANDARD SECURITY PROTOCOLS AND UNDERGOES RIGOROUS TESTING AND CERTIFICATION.

Key Security Features

SOC 1 Type 2 Compliant

256-Bit SSL Extended Certificate Layered with HTTPS

Fully Redundant Data Centers

Two-Factor Authentication

Secure Credential Protocols

Key Security Benefits

Role-based application security with flexible single sign on ensures data protection.

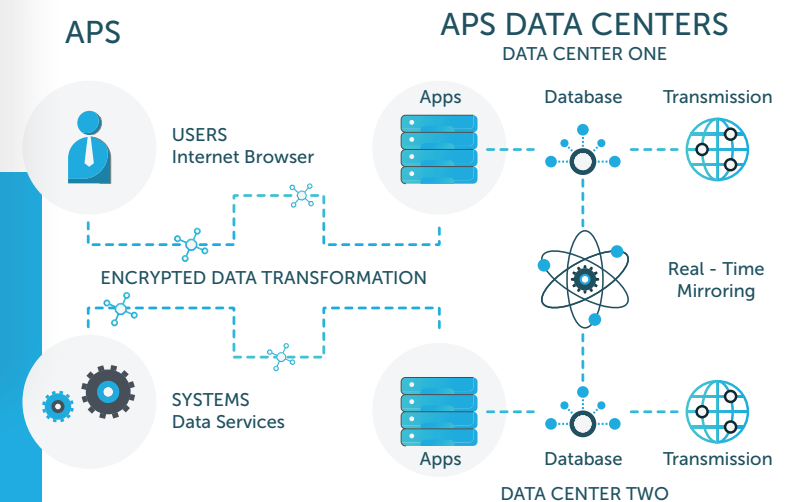

Regular updates rolled out to all customers for enhanced performance.

User sessions are authenticated and data changes are tracked for a complete audit history.

APS complies with industry-standard security protocols and regularly undergoes rigorous testing and certification to ensure your business data is always protected.

There are many benefits to using cloud-based software for human capital management, including providing reliable, uninterrupted service. But the key advantage is knowing that information is secure and protected.

APS provides this infrastructural investment to all our customers, who gain a comprehensive, high-performance solution with a lower total cost of ownership.

Trusted Data Centers

APS servers are hosted at SOC 1 Type 2 compliant facilities. They feature 24x7x365 onsite personnel, biometric access control, video surveillance, and physical ID check. The data center facilities use fully redundant power, each with backup generators on standby. All systems, networked devices, and circuits are constantly monitored by APS and the data center providers.

Strict Access Controls

APS maintains an application audit log, including security events such as user logins or configuration changes. We utilize two-factor authentication, requiring both a password and authenticated device for access to the system. Additionally, APS follows secure credential protocols by assigning unique user IDs and passwords to each user and requiring a minimum number of alphanumeric characters with password complexity requirements.

Protection & Security

APS is SOC 1 Type 2 compliant, regularly performing risk assessments and audits to achieve high levels of security. We employ numerous methods to assess and manage risk and strive to identify and prevent risks at an early stage. Our approach ensures that we are providing a secure and protected solution for our customers from day one.

Secure Data Transmission

All communications with APS servers are encrypted by default using a 256-bit SSL extended certificate layered with HTTPS for additional security. This ensures that all data transferred between you and APS is secure during transmission.
