

AN INTRODUCTION FOR BROKERS & ADVISORS

BenefitScape is the leading US Employee Benefits company to focus exclusively on employer compliance under the Affordable Care Act [ACA]. This singular focus and our dedicated **ACATech®** platform enable us to free your clients, with cost-saving efficiency, from all the pain, penalty risks, and resource burdens of ACA Compliance.

From performing an ACA Compliance Assessment, to Tracking Hours and Calculating Eligibility, through IRS coding and Reporting, to the final IRS E-Filing, we work seamlessly with your own and any client set-up, all data formats, and at any stage or throughout the compliance process. And, we don't stop when reporting is complete. We assist in any necessary remediation, any subsequent IRS 226J or 5699 responses, and by establishing go-forward Risk Mitigation plans.

BenefitScape has deep roots in Health Reform compliance, extending back to Massachusetts Health Reform in 2006. Since 2015 we have supported ACA Compliance for more than 300 companies of all sizes and in diverse sectors throughout the USA – and with a 100% success rate.

Broker/Advisor Partnerships

BenefitScape believes in building strong relationships with Broker/Advisors and their clients. Our ACATech platform and all our operations have been designed for total flexibility in how we work with your clients, and how we work with you as their broker and consultant. Whether on a simple referral basis or as a joint team for consulting, technology, and services, we adapt to you and your clients' needs. We can operate as an end-to-end service throughout the ACA Compliance life-cycle or provide specific services and RegTech support at individual stages along the way. [See *The ACA Compliance Process At-A-Glance* from your BenefitScape team.]

Please feel free to talk to us about how we can tailor BenefitScape's services and ACATech platform to work with your specific operations and needs for Tax Year 2018. Our team is always available to share unrivaled specialist insight into ACA Compliance, including our **Diagnostics and Penalty Risk Assessment Service**, which can help you identify, manage, and mitigate any potential exposure incurred by your clients' prior ACA filings.
