## WHAT IS HUMAXA?

What if solving employee engagement and performance was mindlessly easy?

According to Forbes and Statista, **the cost of employee disengagement in 2019 was \$1.6 Trillion in just the US.** Humaxa provides technology that improves employee engagement and performance through an AI assistant named "Max."

**What does Max do?** "Max" chats with employees about how they are doing, what they need to perform their best, and offers to take the actions it predicts will work.

**Maxine Phama** 2:47 PM

Hi, Max. I'm struggling at home with the kids while I'm trying to work. It's terrible.

**Max** APP 3:34 PM

It's unfortunate that you feel this way, but perhaps I can help with that! Would you like to join a group discussion about working at home with kids?|

**Carolyn Peer** 3:20 PM

Hi, Max. I'm unhappy, I'm not getting any professional development, and I'm battling social isolation.

**Max** APP 3:34 PM

I could try to arrange a mentoring activity so that you would get the professional development you're looking for! What do you say?

Humaxa's patent-pending *suggested activity engine* predicts which actions will return the best results, and it offers to initiate those actions for you. It's based on our founders' 20 years of speaking with clients and employees in the HR Technology Industry.

Humaxa tracks engagement and performance metrics in more than 18 different dimensions, requires no coding skills to customize what “Max” talks about, and helps clients save thousands to millions of dollars per year.

OVERVIEW ENGAGEMENT COMMUNITY

Humaxa is free to try – We’d love to hear from you:
