

# Screenings made simple.

eHealthScreenings  
A Premise Health® company

## Bringing **biometric health screening services** to organizations of any size, from any industry, across the U.S.

As an employer, you need the right insights to deliver the right healthcare benefits. Your employees need an easy way to stay on top of their health and potential risks.

eHealthScreenings delivers everything you need and more, offering you a range of screening options that solve for everyone.

### Types of screenings:

- > Onsite workplace event
- > Offsite lab
- > At-home self-collection kit
- > Physician screening form

### Collection methods:

- > Finger stick
- > Venipuncture

After the screening takes place, participants receive a personalized health report providing detailed insights into their health and early detection of potential preventable risks. You'll receive access to an online admin portal along with aggregate and cohort reporting that helps you better understand your population's overall health.

## What biometric health screenings measure:

- > Total cholesterol
- > HDL
- > LDL
- > Triglycerides
- > Blood glucose
- > Height
- > Weight
- > Body mass index
- > Blood pressure
- > Waist circumference
- > Metabolic syndrome analysis

You also have the option to incorporate other comprehensive screening panels as desired.

## Discover a better approach to biometric health screenings.

### We're the experts.

Biometric screenings are the only thing we do and we're the best at it.

### We're integrated.

We have the flexibility to integrate with your existing health and wellness partners or platforms to help participants interpret and act on their screening results.

### We're collaborative.

We help you gather and distill insights to better understand your population and optimize your benefits strategy.

### We're value-driven.

We pride ourselves on our ability to offer the most robust screening program at competitive pricing that delivers on economies of scale for you.

### We're customer service-centered.

Our steadfast commitment to you is to deliver high quality screenings with an unparalleled experience.

## You need a **technology-enabled** screening partner.

Our innovative screening platform is reliable, secure, and HIPAA-compliant. Participants can schedule a screening, view their results, and share reports with their primary care provider all from one place. If you're looking for a high tech and high touch solution that enhances the screening experience, we're the partner for you.

### Additional technology capabilities include:

- > Single source sign on
- > Data export
- > Eligibility file import
- > Co-branding or white labeling
- > Custom reporting
- > Proprietary Encrypted Biometric Information Transfer (E.B.I.T.)

 **2,200+**  
offsite lab locations

clients

 **97.5%**  
client retention

 **99%**  
participant satisfaction

 Licensed physicians and wellness technicians in all 50 states

## Benefits for **you**:

### **Customizable events.**

As the biometric health screening experts, we advise you on the event type and locations that will be most convenient and engaging for your population to achieve your participation goals.

### **Support from start to finish.**

A designated support team, including a project manager, will help promote your event and ensure screenings run smoothly. Our best-in-class wellness technicians are held to the highest standards in qualifications, service, quality, privacy, and professionalism.

### **Actionable reporting and insights.**

You'll receive condition-specific trend reports to help identify prevalent conditions within your population so you can enhance your benefits package and lower the trajectory of health-related costs.

## Benefits for **participants**:

### **Empowered with personal health insights.**

Learning where they stand with their health, while gaining insights into current and potential medical issues, is an important step to prioritizing health and wellbeing.

### **Easy to use.**

Participants can book an appointment, complete their registration, and receive pre-event information using our intuitive online scheduling portal or have the option to speak with someone by phone.

### **Interactive educational resources.**

Participants have access to current and historical health records and animated educational videos that explain what their results mean. Plus, bilingual English and Spanish support make all participants feel comfortable and informed throughout the screening process.

## Gain insight into your population's health.
