

# Keeping employees engaged in diabetes management hasn't always been easy. Until now.

Introducing  
**pogo**

A comprehensive diabetes management program that helps employees stay engaged from **Day One**.

## Here's what you can offer every eligible employee:

### **A One-Step™ monitor that helps remove barriers to testing.**

To test with traditional glucose meters, employees have to interrupt their day and go through a complicated routine handling separate lancets and separate test strips. But, no more. POGO Automatic® Blood Glucose Monitor lances and tests in One-Step, making it easier for employees to follow their recommended testing regimen.

### **A truly personalized experience, based on each employee's needs.**

The *Patterns*® for POGO Automatic app syncs with POGO Automatic and provides data that helps employees track and manage blood glucose results. Tailored educational content and evidence-based health and wellness resources are delivered to support employee behavior change for diabetes and beyond.

### **Live one-on-one coaching with leading diabetes professionals.**

The coaching program is powered by INTERVENT, a leader in health-related behavior change with over 20 years' experience. Certified Diabetes Care and Education Specialists work with employees to create a step-by-step plan and review their progress each month.

A turnkey program.  
Advanced technology.  
Expert coaching.

Offered through a cost-effective  
PPPM (Per Participant Per Month) model

**Have Confidence.** Our coaching program carries a world-class Net Promoter Score of 72<sup>1</sup> and POGO® 360™ provides reporting metrics for employers to measure success and engagement.

## The program includes:

### Advanced testing device

- POGO Automatic® Blood Glucose Monitoring System, the first and only FDA-cleared, One-Step™ blood glucose monitor with 10-test cartridge technology, ending the need for separate lancets and separate test strips
- Press Once. GO!™ for convenient and discreet testing—anytime and anywhere they choose
- Continuous supply of POGO Automatic Test Cartridges delivered to employees

### Customized digital interaction

- Patterns® for POGO Automatic app
- Key analytics to monitor trends
- Set glucose targets to promote action
- Schedule reminders to avoid missing important testing times
- Designate contact for emergency alerts

### Coaching by INTERVENT

- Leader in health-related behavior change
- Over 115 peer-reviewed publications
- Live one-on-one coaching with a Certified Diabetes Care and Education Specialist
- Individualized wellness and progress reports
- Personalized meal and exercise plans
- Healthy recipes
