

# Accolade Plus

An integrated population healthcare solution that delivers guaranteed outcomes and savings.

With Accolade Plus your employees and their families get the healthcare experience they need. Our team of experts integrate and deliver benefits navigation, care management, primary care and expert medical opinion services for guaranteed outcomes and savings.

Accolade Plus includes virtual primary and integrated mental healthcare, expert medical opinion services and personalized advocacy for every member. Accolade Plus integrates advocacy and care delivery, replacing member services, provider services and care management programs. Our care management programs support every healthcare need —acute and chronic, medical and behavioral – to set members up for success. By developing personalized recommendations for members at every risk level, we deliver a better, more reliable healthcare experience for every person we serve.

## Accolade Plus

### **Comprehensive engagement**

We use inbound member and provider interactions and data-driven clinical outreach to ensure we reach the right members. This approach engages 70 percent of your entire member population.

### **Data-driven insights that influence action**

Accolade's True Health Engine combines factors including clinical risk, social determinants and provider relationships to build a more comprehensive picture of each member's risk and enable earlier, more meaningful engagement with them.

### **Comprehensive clinical intervention**

By making primary care, mental healthcare and expert medical opinion available virtually, we're able to meet members where they are. Then we go further, seamlessly integrating Accolade's services with each customer's healthcare and benefits ecosystem, including third-party applications, to further increase program utilization.

### **Proven results.**

Our approach results in measurable actuarially validated savings for our customers. We reduce your company's healthcare costs across the member population, including all age groups, demographics, geography and condition levels.

**The personalized, integrated care model of Accolade Plus can make your employees healthier and happier.**
