

MediBridge

A Total Network Replacement Solution

Our Process

Reference based pricing seeks to change the reference point for determining allowed amounts paid to healthcare providers using a multiple of Medicare. By utilizing MediBridge, employers will experience a hands-on approach to claim reviews.

PPO networks do not allow for claim audits before payment. The result can be costly and fraught with errors. By removing the PPO, MediBridge provides the kind of control employers have when buying other goods & services for their business.

Our Difference

Repricing to Medicare is “easy,” it’s the disputed claims that separate the different vendors, from how they handle them to how they charge for their services.

6 Degrees Health:

- ✓ Uses negotiation to settle disputed claims
- ✓ Typically has limits set for capping negotiation settlements
- ✓ Variability in approach can negotiate or settle
- ✓ Often has a per employee per month (PEPM) fee structure
- ✓ Less “noisy” and negotiations get balance bills resolved faster

Patient Advocacy

Member support with provider communication and one-on-one education

Provider Contracts

Negotiated rates ranging from single cases to comprehensive direct contracts

Repricing

Objective reimbursement for health services using multiple benchmarks

Cost & Quality Data

Data to support audits, claim negotiation, contracting, and market analysis

Transplant & Specialty

Bundled rates for transplant & specialty care

Optional Services

Cash Prepay

Contracted services paid at or below the designated plan reference price
