

InHouse Physicians offers a holistic solution – allowing you to deliver convenient access to flu vaccinations for all of your employees

Your Trusted Medical Expert – Flu Vaccination Program

Keep your Employees Healthy, Productive, and Driving Revenue With InHouse Physicians' Flu Plus Vaccination Program.

Why Choose InHouse Physicians?

SERVICE

IHP has a 20 year track record of exceeding our clients' expectations. Our long list of global Fortune 1000 clients benefit from IHP's commitment to delivering an unsurpassed customer service experience.

NATIONWIDE PRESENCE

Our network of healthcare professionals guarantees that IHP can deliver flu vaccinations to all of your employees nationwide. This allows our clients to leverage their buying power – ultimately lowering costs.

FLU COUPON PROGRAM

Driving employee participation is key to a successful flu vaccination program. IHP has the ability to reach not only your employees at company headquarters, but also your remote employees with our flu coupon program. Remote employees are geographically dispersed and rarely able to take advantage of corporate on-site flu clinics. IHP's flu coupon program allows your employees to simply register and print their flu coupon online. Then, at their convenience, they can redeem their coupon for a flu vaccination at any of InHouse Physicians' participating partner stores nationwide.

DATA & REPORTING

IHP's patient management system can track flu shot participants' self reported absenteeism and health care utilization data. We will then provide you with an ROI statement that can be leveraged to support your flu vaccination program.

Imagine the Impact to your Company's Bottom Line If Your Work Force Came Down With the Flu...

- For each episode of influenza infection, an average of 4.8 working days are lost.*
- Approximately 10-20% of your work force will suffer from influenza this year
- A recent study by ComPsych Corp., Chicago, found that employees that receive the flu shot are 50% less likely to take sick days in the winter.
