Getting started in three easy steps

Step 1: Set up your profile

Mineral constantly monitors laws and regulations so that you know what actions to take and when. Many of these regulations vary based on your number of employees or what states you operate in, so make sure that you get the most relevant recommendations by updating your company profile.

To get started, select the Avatar 😤 located on the menu bar and select Company. From here, you can select Edit to:

Update Company Information: Review or update the information here to ensure your company information is up-to-date.

Add a New Location: On the right-side menu, select Add Location. Complete all required boxes for the new location and select Save Settings.
