

Turning genomic insights into healthier lives

Genomic Life's benefit optimizes health care spending by simplifying access to genomic screenings and personalized cancer navigation. This revolutionary approach supports the discovery of health risks, informs treatments, and offers effective approaches to care to enhance employee health.

We use genetics and personalize navigation to improve health

Essential Genomics

A suite of genetic tests offering insights into health and predisposition to diseases, specifically cancer. The genetic tests and features include:

- **Multiple CLIA certified genetic testing labs**
 - Genetic Health Screen
 - Pharmacogenomics
 - Plus More...
- **Genetic Counseling**
- **Individualized Clinical Action Plans**
- **US-based Member Support**

1 in 6

*Roughly 1 in 6 people carry a genetic change that increases their risk for diseases that have medical interventions available.**

Precision Cancer Genomics

If a person is diagnosed with cancer, they receive ultra-personalized oncology navigation to tailor treatment and receive support and expert resources for shared decision-making.

Cancer Support Encompasses:

- **Oncology Navigation**
- **Diagnostic Inherited Cancer Panel**
- **Expert Pathology Review**
- **Comprehensive Genomic Profiling**
- **Focused Molecular Testing**
- **Liquid Biopsy for Screening and Monitoring**
- **Pharmacogenomics Test for Cancer**
- **Pre- and Post-Test Genetic Counseling**
- **Physician Consult**
- **Clinical Information Line**
- **Clinical Trial Education**
