Healthcare Data Solutions to fuel the Digital Health Industry

Far too many digital health companies fail to achieve their market potential because they are unable to harness the full power of healthcare data. It's not for lack of effort, technology, or expertise, rather much of the data needed to support critical business operations are unmanageably complex and reside out of reach, scattered across clients' vast vendor ecosystems. Digital Health Solutions need a trusted healthcare analytics partner to make healthcare data more accessible, so they can leverage this to grow their customer base, prove value to existing customers, and scale their business.

We convene a critical mass of healthcare clients, integrations, data, experience, and analytics assets:

1000+
Large, self-insured employer clients

550M+
Medical and Rx claims processed monthly

1380+
Pre-built adapters for healthcare data files

98.6%
Avg monthly match rate in member algorithm

16M+
Lives being served

1500+
Healthcare specific metrics

17
Healthcare specific algorithms

40%
R&D spend against industry avg of 23%

We have combined healthcare expertise of 700+ years in operations!

Artemis Health is extending its existing platform capabilities to accelerate Digital Health Solutions and the impact their programs have for self-funded employers.

We handle the heavy lifting and deliver data in an analytics-ready format through our interactive user interface and a secure data lake.

E2E Data Management

- Acquisition
- Ingestion
- Transformation
- Normalization
- Enrichment

Robust Data Enrichments

- Service Categories
- Episode Groups
- Gaps in Care
- Risk Adjustment
- Benchmarks

Configurable Applications

- Artemis Perspectives
- Artemis Console
- Artemis Cost Advisor
- SDoH Insights
- Ad-hoc Analytics

Target and engage high-impact members.

Access member-matched data across eligibility, medical claims, Rx claims and your own data sources. Increase your member-base by targeting non-participants who are a good fit, and designing personalized care workflows.

## Prove program outcomes and validate ROI.

Leverage the power of Cohorts within the Artemis application to monitor and measure the impact of your program. Connect your own business intelligence tools to perform custom analytics and run your own AI/ML models to highlight the value of your program.

Before Program	$396
Control Group	$468
Treatment Group	$295

$500
$300
$100
$0

Artemis Health liberates your data team.

Artemis Performs

- ⓘ Aggregation
- ⓘ Profiling
- ⓘ Ingestion
