

Empower your employees with a genomic-based healthcare solution

As healthcare costs and employee attrition continue to rise, many organizations are looking for an employer healthcare benefit that:

- Reduce cost
- Attract and retain talent
- Improve the health and well-being of employees

48% of employees say “attractive benefits” would drive them to a particular role, ahead of salary

56% of employees say benefits are a key factor in staying at their current job

Employee turnover is estimated at **6-9 months** of an employee’s salary

It is estimated that employee turnover accounts for **\$1 trillion** in costs for American businesses

WithHealth’s Precision Care Program is at the forefront of healthcare transformation.

Key benefits include:

- ✓ Pharmacogenomics reporting - how a person's unique DNA affects drug response
- ✓ Genomic profiling that can reveal potential chronic illness risks
- ✓ A physician-led Precision Care Plan based on health history, DNA, labs, environment and lifestyle
- ✓ Technology enabled Precision Care Home Assessment Kit
- ✓ Extensive personalized data collection and aggregation of health history, genomics, vitals and biometric blood panels
- ✓ Unlimited care coordination-proactive and personalized to the employee and their health goals

About WithHealth

WithHealth, Inc. was founded in 2017 to deliver on the promise of precision care by transforming the healthcare experience to improve employee health and employer outcomes. WithHealth®, a genomic-based precision care company, makes healthcare affordable, proactive, accessible and preventative by utilizing genomics, digital twin technology, augmented intelligence, and care coordination to provide a 360-degree individualized health profile.

WithHealth is Trusted by Employers and their Employees

From CEOs and their executive teams, to employees, production crews and A-list talent, we integrate seamlessly into organizations to improve employee health and employer outcomes.
