Compatible with most Android OS and Apple iOS models. See fitbit.com/devices for more info. 2. Battery life varies with use and other factors. Always-on mode requires more frequent charging. Fast charging enables 24 hours of charge with 12 minutes of charging. Notifications and on-wrist calls available when phone is nearby. Voice assistant availability and features may vary. See fitbit.com/voice. Google is a trademark of Google LLC. Skin temperature variation tracking and SpO2 are not available in all markets. The SpO2 feature is not intended to diagnose or treat any medical condition or be relied on for any other medical purpose. 3. Available in select countries. Not a replacement for medical advice and not intended to diagnose or treat any medical condition. Intended to help you monitor and keep track of your information. Talk to your healthcare provider for more guidance. 4. Daily Readiness requires a Fitbit Premium membership. Premium content recommendations are not available in all locales and may be in English only. 5. The Fitbit ECG app is only available in select countries; not intended for use by people under 22 years old. See fitbit.com/ecg for additional details. 6. Only available in select countries and with select Fitbit products; not intended for use by people under 22 years old or with known atrial fibrillation. See here for additional details. 7. Requires Fitbit Premium membership. Not intended for medical purposes. Consult your healthcare professional for questions about your health. 8. Use of the cEDA sensor may affect battery life. 9. Data rates may apply. Google apps are not available in all countries or languages. See here for availability details.
