INNOVATIVE BARIATRIC SURGERY SOLUTIONS FOR OBESITY IN THE WORKPLACE

OBESITY IN THE WORKPLACE

With nearly 38% of U.S. adults suffering from obesity, we have seen medical costs skyrocket due to obesity-related diseases and risk factors including: type 2 diabetes, heart disease, joint disease, hypertension and many more. U.S. employers are experiencing a majority of this financial burden due to obesity-related costs including:

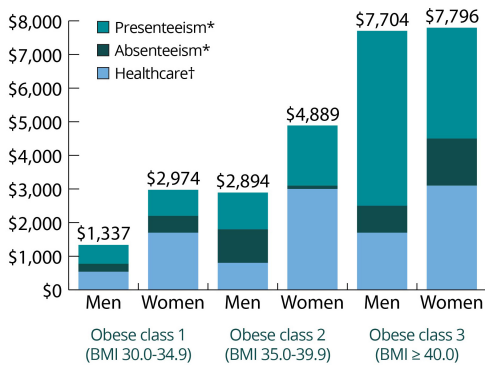

Direct Costs

Preventive, Diagnostic and Treatment Services; including drugs to treat comorbidities.

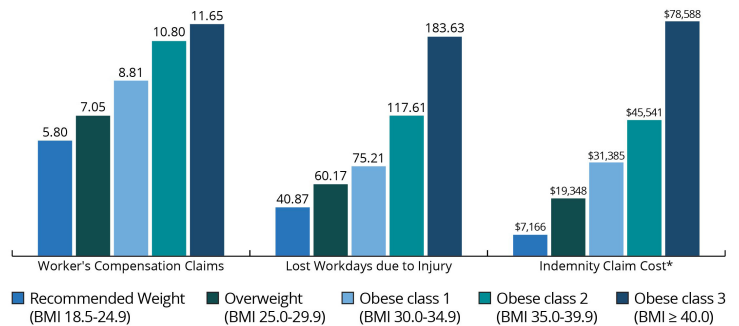

Indirect Costs

Absenteeism, Presenteeism, and loss of future earnings due to illness, disability and premature death.

Additional Yearly Per Capita Healthcare and Productivity Costs Due to Obesity Among Full-Time US Employees²

Workers Compensation Claims, Lost Workdays due to Injury, and Indemnity Claim Costs per 100-Full-time Equivalents.¹

WHY BARINET

Bariatric Surgery has proven to be the most effective treatment option for morbid obesity and its associated comorbid conditions. Our unique, exclusive network of bariatric surgeons and healthcare facilities is clinically integrated to provide bariatric care at the highest level. BARInet is the only bariatric surgery network in America able to include risk assurance and value added pricing that incorporates a truly bundled pricing delivery model.

As an add-on to your existing health benefits or an alternative to your current bariatric surgery benefit, our Bariatric Surgery Benefit Management Program is designed to:

Provide state-of-the-art surgical intervention for morbidly obese plan members

Yield better results through innovative plan design strategies and incentive programs

Reduce overall healthcare costs for plan sponsors and plan members

Integrate seamlessly within or along side current benefits

The First Comprehensive Bariatric Surgery Bundled Payment Solution for Employers

OUR SOLUTION

BUNDLED CONTRACTING

Our exclusive, narrow-network design allows us to drive down pricing, while ensuring high-quality outcomes through our standard bundled design. Our bundles include “episode of surgery” discounted case rate pricing, with an *extended readmission warranty*.

TOP QUALITY PROVIDERS

Access to top-quality surgeons and hospitals in your local market. We identify them using a proprietary underwriting model focused on quality. Quality care is top priority, and we continually work with our stakeholders, including patients and strategic partners, to improve our results.

CARE COORDINATION

Concierge care service available to assist plan members throughout their care process. We are there along the way to both improve the care experience and reduce the cost of care for plan members.

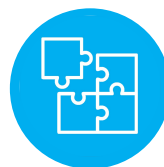

READMISSION WARRANTY

The self-funded plan’s assurance that if known medical complications arise from bariatric surgery, the clinical integration of provider and facility will assure no additional medical expense to the employee or the employer.

CUSTOM BENEFIT DESIGN

Our carve-out design and non-essential benefit status allows for custom benefit design. From eligibility requirements to separate copay amounts, design a benefit that works within your budget, and that will ensure the greatest chance for success.

SEAMLESS INTEGRATION

Implementation and operation of our benefit is effortless, from efficient claims processing to integration with existing benefits. You can easily customize policies and procedures to fit your organization.

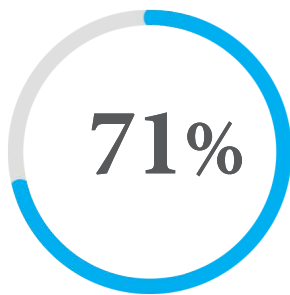

DATA REPORTING

Program monitoring and data reporting systems available with the ability to measure and report program effectiveness.

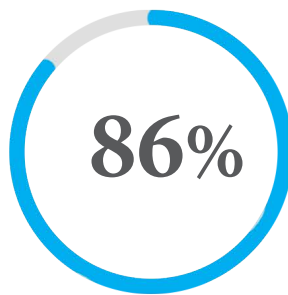

REAL RESULTS. REAL SAVINGS.

Bariatric surgery is a well-documented treatment for obesity, that when offered in a highly-managed fashion as part of our Value-Based Benefit Design, can yield tremendous results and savings. These savings result from the excess weight loss associated with bariatric surgery, which have shown to lead to vast improvements in obesity-related health conditions and overall quality of life.
